## Battery for ford focus key fob 2016

Electronic car keys, also called key fobs, are useful in controlling your car's doors, trunk, and alarm, and can even remotely start your car from a distance. Like any other electronic device, these key fobs can malfunction after some time, typically due to signal loss. However, in such a case, you can easily reprogram the remote yourself so you can still use it. This article, will explain step-by-step how you can program your car key fob so you don't have to take it to an auto-dealer and spend your precious money. How to program a key fob Different car models have different ways to program their key fobs. The process mentioned below is the simplest way to reprogram any remote in general. This guide works with most car models on the market, but sometimes you need to find special information for your car model. You can find more specific information about your car's remote in the owner's manual. Follow these steps to program a key fob at home: Before doing anything else, replace the battery in the key fob/s if you haven't done so for a while. A bad key fob battery can give you a real headache while you are trying to reprogram it. The batteries are often cheap and also easy to replace. Check your owner's manual if you do not know how to replace them. Get in the driver's seat with your car keys and the remote and close all the doors. Closing the doors is very important, as it may disturb the process if you leave one open. Once seated, insert the key into the ignition and turn to the 'On' position so the electrical systems are powered. Make sure that the ignition is not in the radio mode, and do not start the engine. With the key in the 'On' position, press the fob's lock button and turn the key back to the 'Off' position. Repeat this process at least three times, ending the cycle with the key in the 'On' position. This sends an indicator to your electronic control units that it's your key in the ignition sending out the signal, and it does save the data afterward.RELATED: How to Unlock & Start a Car With a Dead Key Fob Once you have repeated the above process, you will hear the lock sound. This indicates that you have entered the programming mode. Once this is done, press the lock button again within five seconds, and the programming will succeed. If there are additional remotes, press the 'Lock' button within 10 seconds after you enter the programming mode to program those remotes as well successfully. Once the above steps are performed, turn the ignition back to the 'Off' position to terminate the programming procedure. Take your key fobs with you and leave the vehicle and close all doors. Test to both unlocks with all your key fobs that got programmed to verify the function. Estimated Cost: 5 USD Specialist Hardware Required for key fob programming For some cars, key fob programming may not be easy, and in that car, specialist hardware may be required. Typically, we would suggest that you call your authorized car dealer, but this can be expensive. You can have your car remote key re-encoded from any other auto locksmith company or a mechanic workshop for a comparatively lower price and have a separate master key made. Creating a new master key may require a code card which can be found in your car's manual. RELATED: Lost Car Keys – Cost & Replacement Keys Understanding Vehicle Security Car security can be divided into two categories – Car entry and Starting the car. In most modern cars, you do not have to insert keys to open the doors since they have remote locking/unlocking. The older car remote entry systems used RF systems not fully secure as their signal could be easily captured and played back to unlock and enter the vehicle. The modern entry locks use a more sophisticated rolling code system that generates a new code every time. The receiver on the vehicle also produces the same code, so both the electronic devices are synchronized. Infrared systems were also used by some European manufacturers who required pointing the remote towards the car to unlock. Still, most have been replaced with RF technology now. Talking about starting the vehicle, traditional cars had a simple key lock system that could be unlocked from any similar key. This was convenient for thieves as it allowed them to drive away with any car easily. However, new cars have ECU technology and a transponder for added security. Luxury vehicles can be coded according to the driver's specifications. For instance, vehicles such as Rolls-Royce have a memory function, and as long as the driver inserts the key, the seats, headrest, mirrors, and steering wheel are adjusted according to the driver's settings. Manufacturers are now working towards removing the need for the key altogether and adding a fingerprint recognition system. What is a Transponder? Transponder technology is now apparent in many areas that require security access and are now popular in modern automobiles. New vehicle keys now feature a transponder chip, and as the key is inserted into the ignition, the chip is triggered by the radio frequency signal sent from the ignition barrel. The chip then transmits a signal to the car's ECU, which, when found to be correct, disables the immobilizer and starts the engine. If it is only the key fob itself to unlock the car, you can most often program it yourself. However, programming a key for the start function is impossible without the right tools. Reprogramming a key fob for the lock and unlock costs nothing if you do it yourself in most car models. However, if you need to program the immobilizer function, you can expect a total cost of 200\$ to 500\$ for reprogramming at a workshop. Most often, to program key fob push-starts, you need the right diagnostic tools because of the immobilizer, which only the authorized dealers have access to. If you just want to reprogram the unlock and lock feature, the method is the same – as a standard key fob though; you just need to learn how to switch on the ignition properly. To erase the key fob memory, you need to use a suitable OBD2 diagnostic tool. Not all general scanner tools can do this, and you most often require a specific tool for your car model. How to program, which remote to buy, cost & more.All FAQ Ford keys replacement near me – Things to remember before calling a locksmith or dealerFord key replacement near me – Relevant information!Calling an automotive locksmith or a dealer near your location when you need a key replacement is probably the most common thing to do. Based on your location, an automotive locksmith can come to you, or you may choose to tow the car to the dealer.We outline a few points to remember, to help you save some time and money regardless of which option you choose:2020-2021 Ford key fob replacementFirst, always ask for a quote. Describe the problem in detail and give the automotive locksmith all the details, even if you think they may not be relevant.Moreover, if the locksmith has all the details, it can speed up the process and make it more cost-effective. Remember to give them your exact location to prevent a long waiting period. It may also affect the price.In addition, tell the locksmith/dealer if the ignition was changed before, as far as you know. A previous ignition change may result in different keys for the ignition and doors.Variety of Ford keys – Different yearsMost Ford models today are equipped with chips or transponders, so make sure you mention the exact year, make and model and ask the locksmith if they have the necessary tools in their truck to code the key. Not all locksmiths have a key coding machine to program those keys.In addition, it's important to have the VIN number available as the locksmith may need it.Finally, remember that for most Ford models, there is no need to tow the car to the dealer should you lose your car keys. An automotive locksmith should be able to make you a new car key on site.Back to topWhat you should do when your Ford car key is lost and how to get a replacement:How to get a Ford key replacementGenerally speaking, you have three options:First, call an automotive locksmith that offers a mobile service for Acura cars. We can help you with that.Second, tow the car to the dealer.Third, order a key online and have the dealer or locksmith cut and program (if necessary) it for you.For a more detailed explanation including tips on how to SAVE TIME AND MONEY please visit our blog post: How to get a replacement key?Ford fob key replacement – Inside look!First, make sure you don't have a spare key. Many of us put one away as a backup for when we lose our key. Take a deep breath and try to remember where it is. Need some ideas of where your key might be? Take a look at this blog post on how to find your lost Ford keys.Second, if you decided to call an automotive locksmith, remember to provide the exact year, make and model, e.g "I lost my keys to my 2019 Ford F150, 2017 Ford Escape, 2018 Ford Explorer, 2015 Ford Escape" etc. This is important so the locksmith can check if he or she has the right key blank/ transponder key/ remote key fob.Coding H-94 PT key on-site by an automotive locksmithIn addition,Remember to ask if the key needs to be programmed or coded, some models do – e.g., a replacement key for 2016 Ford Fusion will need to be programmed, whereas a 1996 Ford Mustang won't.If you think you need a new ignition switch/ lock cylinder, first make sure you don't simply need a new key. Changing the ignition for Ford cars is more expensive than buying a replacement key and it will mean that you will have one key for the doors and another for the ignition.Ford flip key – TransponderWhen calling a dealer to get a Ford replacement key, ask if you can pick up the new key yourself, or whether you have to tow the car there.In addition, if the key won't turn in the ignition, mention if this is something that has happened for the first time or is an ongoing problem.Moreover, if you have previously changed the ignition cylinder, tell the locksmith or dealer as it may prevent them from cutting you a new key by code.Finally, make sure you have the Vehicle Identification Number (VIN) of the car and relevant documents to show ownership of the car. The title certificate, registration papers, your ID and proof of insurance, etc.Back to topGive Us a Call 24/7 For All Ford Car Keys Replacements & Ignition Problems!Call Us Now: 800-223-1453 FAQ Lost Ford Keys Replacement: Q: Ford key replacement cost – How much will it cost to replace a Ford key without the original? What is the average price?The answer below is a short explanation. For a more detailed explanation and GREAT TIPS on how to save money, please visit our blog post: Car keys replacement cost!Ford key replacement cost – EstimateA: In a nutshell, to replace a Ford key can cost anywhere between \$60 and \$150. The price you pay depends on several factors:The type of key/The car's year of manufacture/The day of the week, the time of day (or night!) & your location/Where you get the key replacement (dealer, automotive locksmith, online, etc.)Availability of the code to cut a new key/Original ignition or noFord key replacement cost – Price depends on a few factorsThe type of key you had and the year the car was manufactured are maybe the most important factors.(chip, intelligent fob, "push to start", remote, regular "non-transponder" key). The newer the car is, the better security features the key had and therefore you can expect to pay more than \$250 for a replacement key. Choose your Ford model(from the drop-down menu) and type of key you had for a more accurate price and information.In addition,It depends on where you get a key replacement. The dealer, automotive locksmith or get it online. Click here to get a more detailed explanation.Most Ford keys made after 1998 require coding – Automotive locksmith coding new key on-site!The dealer usually charges about 10%-15% less than a locksmith would for the key. However, most chances you will have to tow the car there to program the new key or remote and therefore the total price is usually higher.Furthermore,Consider that if you are looking to have a locksmith to come out and make you a new key outside regular business hours, the price may go up.2019 Ford EcoSport – New key fobs coded by an automotive locksmithFinally,In case your Ford ignition cylinder was changed before (usually with older cars), that probably means that the code for the key may not be useful and the key will have to be either cut manually by a locksmith or to change the ignition again which in this case the dealer can't be of help.Back to topFord remotes – Smart key, high security key, keyless entry – Different years Q: How can I know if my Ford key had a chip in it? I understand that some keys need to be programmed and some don't?A: A good rule of thumb is that a key that had a plastic cover at the top and/or the was made after the year 1996, most chances had a chip in it.Hence, in case you lost your Ford key and the key had a chip in it, it will have to be programmed on-site in order to start the car.An automotive locksmith for Ford keys replacement can do that on-site. Alternatively, you can contact the dealer, but the car will have to be towed there.Below, an example of the different type of Ford keys & remote key fobs:Fob car key – Fob remote "push to start" car key: Usually looks like some sort of remote. This fob car key has a chip and therefore will need to be programmed.Battery, emergency key and key fob Ford (2020-2021)Ford key fob replacement – Coding is neededFord key fob replacement – Coding is needed(M3N-A2C93142300)164-R8109 Ford key fob2020 Ford key fob replacement – On-site programming by an automotive locksmithThe next image is of a Ford key that has a transponder chip in it and therefore NEEDS to be coded. The chip is located inside the cover at the top.Ford transponder chip car key replacementFord transponder chip car key replacement(H73-PT)H92-PT Ford transponder keyThe next image is of a Ford key that doesn't contain a chip and therefore DOES NOT NEED to be coded. It's a simple metal key.Ford non-chip transponder car key replacement (H75)Ford non-chip transponder car key replacement (H51)Back to top Give Us a Call 24/7 For All Ford Car Keys Replacements & Ignition Problems!Call Us Now: 800-223-1453 Q: Can I get a Ford key replacement by VIN?Ford key replacement by VIN number explainedA: That depends on the year of your car and the type of key you had.The VIN allows the dealer or an automotive locksmith the option to access the key code on file, i.e. to cut you a replacement key by code which makes the process very fast and easy. There are however two things to consider:For vehicles older than 10 years: Ford dealers don't keep a record for vehicles older than 10 years. Therefore, an automotive locksmith is your only option to get a replacement key.For vehicles equipped with a transponder system and/or remote/ intelligent key/ fob key: Codes are available. However, programming is necessary and therefore you will have to either tow the car to the dealer or have an automotive locksmith come and program the key on site.For more information click hereBack to topQ: I Lost my 2013 Ford F150 smart "push to start button" car key fob and have no spare or AAA. Can an automotive locksmith make a replacement Ford key on-site or do I have to tow the car to the dealer?All Ford key fobs require on-site codingA: Sure, an automotive locksmith can make a replacement key or fob for Ford cars.However, not all automotive locksmiths have the necessary equipment to cut and program the key and therefore it would be wise to verify with the locksmith he can cut and program the key.Ford old models key – H50 Q: How long does it take to make a replacement key for a 2010 Ford Explorer?I lost my original and have no spare.A: Generally speaking, for a new Ford key or fob, the process should take between one hour to two, depends on the year make and model of the car.If codes are available, this process is even faster.In addition, we offer 24/7 complete automotive locksmith services for all Ford models including Emergency lockout service, car keys replacement, ignition repair and more.Back to top Q: My 2012 Ford Expedition ignition key won't turn, what is the reason and can you change my model of the Ford ignition cylinder – PartsA: There may be a few reasons why the ignition key won't turn. Worn out key, stuck, rusted ignition or broken wafers. An automotive locksmith for Ford cars can determine the reason on-site and solution. We can help you with that.In addition, in case you lost your Ford ignition key, please remember that in most cases, there is no need to change the ignition.For more information please visit: My ignition key won't turnBack to top Q: My Ford key will not start the car. The battery is good, the lights are on and the radio works. What may be the reason?Ford transponder and non-transponder keys. One reason the car may not start is because the key needs to be programmedOriginal Ford ignition cylinderA: There may be a few reasons why the key won't start the car. A mechanical problem or key related problem. Please visit: My ignition key won't start the car for more information.Back to top Q: Can you explain why there is a difference in the cost of replacement keys between Ford models? What would be the price for a newer model at the dealer VS an automotive locksmith?Both the dealer and an automotive locksmith can code you a new Ford key fobA: The price for Ford key replacement varies according to the year of manufacture and the model. In the main, there are two different types of Ford keys when it comes to replacement key cost:Non-transponder chip key – there is no need to code the key.Transponder chip keys – the key needs to be coded.Here's an example of the price you can expect to pay for a key replacement:Non-transponder replacement key cost –Ford non-chip transponder car key replacement (H62)From a Dealer –If no coding is needed, you can call the dealer and have him cut you a new replacement key, which you can pick up at your convenience.However, if the ignition was changed in the past, as may happen with older models, the codes the dealer has on file will not work and so the key won't turn in the ignition.It is also important to remember that the dealer only has codes on file for the original ignition and up to a certain year. If the car is too old, it may be difficult to get a replacement key from the dealer.Estimated cost: Usually around \$60 for a new key.From an Automotive Locksmith:A locksmith usually charges a service fee plus the cost of the parts and labor for a replacement key.You can therefore expect to pay more than the dealer would charge. However, since the cost of a non-transponder chip key is minor, you shouldn't pay much more than the dealer charge and you have the convenience of a solution at your location as many locksmiths offer a mobile service.Estimated cost: Usually around \$130.Transponder chip / "push to start" / fob / remote Ford replacement key cost:Ford flip keyFrom a Dealer –Keys of this type have to be coded in order to start the car and therefore the car will have to be towed to the dealership which will result in an additional cost.The estimated cost for a transponder key: Usually around \$150 for a new key.An estimated cost for a remote key: Usually around \$350 for a new key.From an Automotive locksmith:2019 Ford key fob replacementA locksmith usually charges a service fee plus the cost of the parts and labor for a replacement key so you can expect to pay more than the dealer would charge.However, an automotive locksmith operating a mobile service can make the key on site and therefore save you time and money and the hassle of towing the car to the dealer.The estimated cost for a transponder key: Usually around \$310 for a new key.An estimated cost for a remote key: Usually around \$430 for a new key.Back to top Q: Ford key cutting – Who can cut and program a new key for my car? Can I get it done at any hardware store or should I go to an automotive locksmith or dealer? What is the procedure and how much does it cost? "Blank" – Unused, new Ford key – Must be cut firstEmergency key of fob on cutting machineA: There are many different types of Ford keys. Some can be cut with a basic cutting machine (mostly for older models made before 2010) and some, such as laser cut keys, can only be cut with a more advanced machine, which not all locksmiths carry, and definitely not hardware stores. Therefore, you should do your research before you decide where to get your Ford key cut.The next image is of a non-transponder car on a regular cutting machine – Ford keyIn addition, there are a few things to consider:First, you have to remember that cutting a new Ford key probably won't be enough for you to start your vehicle as most Ford models made after 1998 requires coding in addition to cutting the key. Saying that, you will have to take care of coding the keys as well AFTER you had your key cut. Click here to see programming information for Ford fobs, remotes and transponder keysThe next image is of a cut key(or key fob) and a programming machine for Ford Key:Programming machine and key fob for Ford modelsSecond, try to get the key code, which makes the process of cutting a new key very fast, from your dealer. They should be able to provide it for you after verification that you are the owner. Once you have this code, any locksmith should be able to cut you the key within minutes, and it would be cheaper as well.How much should you expect to pay for cutting your Ford key? (Not including coding/programming)Ford key fob and emergency keyKey fob and Ford battery replacementLaser-cut keys or remote emergency keys – About \$50 if you have the key code. (If not about \$80)Regular key, transponder keys – about \$20 if you have the key code. (If not about \$50)Back to topQ: I called my Ford dealer as I need a replacement key for my 1996 Ford Ranger. Unfortunately, they told me they can't make me a replacement key as they don't have the information on file. Can you explain why is that, where can I get a replacement key and how much should it cost?A: Yes, Ford dealers, like other car brand dealer, use a code to cut a replacement key. These types of codes are available only for limited years, usually about 10 years or so. Therefore, if your Ford model is older than ten years ago, you may have a problem of getting a replacement key from the dealer. In this case, an automotive locksmith would be your best option. The estimated cost should be around \$125.Back to top Here is the complete list of Ford models we can help you with:Aspire, CMAX, Cobra, Contour, Crown Victoria, Edge, EcoSport, Escape, Escort, Festiva, Fiesta, Five Hundred-500, Flex, Focus, GT, Freestyle, Fusion, LTD, Mustang & Mustang GT, Probe, Taurus, Tempo, Thunderbird, Ford trucks:Aerostar, Bronco – Bronco II, Econoline Van & Club Wagon, E-Series, Excursion, Expedition, Explorer, F-150, F-250 & F-350 Series, F-450, F-650, F-750, Freestar, Ranger Pickup, Super Duty Series, Transfer Heavy Trucks 6000-9000-CF7000, Transit, Transit Connect, Windstar, ZX2Give Us a Call 24/7 For All Ford Car Keys Replacements & Ignition Problems!Call Us Now: 800-223-1453 Useful links:Home PageOur BlogContact UsFord official siteBack to top
